# KMU Gas Services

Since 1928, Kansas Municipal Utilities (KMU) has served as the not-for-profit statewide trade association representing municipally-owned and operated utilities. Currently, the association supports 175 member cities operating municipal electric, natural gas, water, wastewater and telecommunications utilities.

In 2004, KMU began offering natural gas services to member systems. As a not-for-profit organization, KMU is able to offer this much-needed expertise and assistance - of particular value to smaller natural gas local distribution companies (LDCs) - at a reasonable price. In addition to work for gas utilities, KMU Gas Services has been instrumental in locating natural gas leaks in municipal power plants in order to avoid catastrophic failures in electric facilities.

Mike Tilson, KMU Gas Services Specialist, provides these and numerous other services to member cities and utilities. Mike brings with him nearly thirty years of experience in natural gas pipeline and distribution inspection, safety and compliance. He has

inspected pipelines across the United States and helped numerous small communities in the new construction of pipelines, regulator stations and other gas infrastructure.

For further information about KMU Gas Services, please call Mike at KMU at 620/241-1423 or on his cell phone at 316/644-3276. He can also be reached by email at [mtilson@kmunet.org](mailto:mtilson@kmunet.org).

## Leak Surveys & Corrosion Services

- **\$500 per day, plus mileage** (members)
  - **\$650 per day, plus mileage** (pipelines)
